CD 1485

12/27/68

Dear Moo, Oswald's literature distribution-"Wasp".

Here are pages 4-6 and 11 of CD 1485. I do not recall that they were sent you earlier.

When we spoke a short time ago I suggested you ask Lt. Alleman or the Harbor Police for any report on the fingerprints the FBI may have supplied. It is pretty conspicuous that with the FBI allegedly looking for Oswald's accomplices, the person whose fingerprints were identified could be important knowledge. It is also possible that these were "new" rather than old prints.

It will be necessary to make further check before we can be positive, but the original typed report of the incident is not here included. It, quite obviously, should have been, particularly because recollections seem less sharp than the FBI or Commission should have desired.

This FBI treatment is so vague one cannot learn from it whether the fingerprints are or one or two people.
